Advanced Manufacturing

Manufacturing process

Every GLOCK pistol carries 100% GLOCK quality!

By revolutionizing firearms production in the early 1980's, GLOCK became the worldwide leading pistol manufacturer and brought its manufacturing process to perfection.

Full control of raw material

GLOCK has established stringent quality control procedures for internal and external resources. An example of this is the high quality weapon steel being analyzed by the in-house metallurgical department. Only raw materials which comply with the specifications defined by GLOCK are accepted into the production process.

High level of vertical production

Manufacturing activities range from tool making to molding and machining 100% of the components of the final product. Created on the desks of the research and development team, each GLOCK product is immediately linked to the toolmaking department by CAD construction drawings in order to build the necessary tools for the production process. This process includes hammer forging, CNC milling and turning, stamping of strip steel, winding of springs as well as polymer and metal injection molding.

Torture testing

Arctic temperatures or merciless heat, salt water, mud or sand, professionals throughout the world engage in the most hostile environmental conditions and the same is required of their GLOCK pistols. Extensive tests are done in-house during the product design process as well as externally during purchasing procedures. GLOCK pistols prove that they are reliable under tough and adverse conditions. The GLOCK pistol is the weapon of choice for many of-ficers knowing that their sidearm is one of the most robust and reliable pistols in the world.

Test firing

Every single GLOCK pistol is test fired to ensure CIP conformity as well as flawless function and accuracy out of the box. An electronic target test device was specifically developed for precision testing to align the hit pattern with the line of sight. Every GLOCK customer can ensure they will be receiving a weapon that has been tested in the factory and operates reliably out of the box without compromises or expensive modifications.

Quality Control – Certified production procedures – ISO 9001

GLOCK pistols have been designed to operate without compromise in extreme conditions of police and military use. Thanks to industry leading quality assurance procedures, which are continuously integrated in the production process, tolerances are strictly limited and reliable operational safety is achieved. To bring our quality assurance to perfection, GLOCK is certified according to ISO 9001 – Quality management systems - Requirements.

GLOCK Safe Action® System

GLOCK's revolutionary Safe Action® System provides a consistent trigger pull from the first to the last round. The three automatic, independently operating mechanical safeties, are built into the fire control system of the pistol.

**Every GLOCK pistol comes with 3 independent safeties:
The trigger safety, the firing pin safety and the drop safety**

All three safeties disengage sequentially as the trigger is pulled. They automatically reengage when the trigger is released.

1 Trigger safety

The trigger safety is a lever incorporated into the trigger. When the trigger safety is in the forward position it blocks the trigger from moving rearward. The trigger safety and the trigger must be fully depressed at the same time to fire the pistol. If the trigger safety is not depressed, the trigger will not move rearward and allow the pistol to fire. The trigger safety is designed to protect against firing, if the pistol is dropped or the trigger is subjected to lateral pressure.

2 Firing pin safety

The firing pin safety mechanically blocks the firing pin from moving forward in the ready-to-fire condition. As the trigger is pulled rearward, the trigger bar pushes the firing pin safety up and frees the firing pin channel. If the user decides not to fire and releases the trigger, the firing pin safety automatically reengages.

3 Drop safety

The trigger bar rests on the safety ramp within the trigger mechanism housing. The trigger bar engages the rear portion of the firing pin and prevents the firing pin from moving forward. As the trigger is pulled rearward the trigger bar lowers down the safety ramp and allows the release of the firing pin. After firing, the trigger bar moves upward and reengages the firing pin. As the trigger is released, all safeties automatically reengage.

GLOCK Pistol Sizes

Safe Action® Pistols

How to choose the right GLOCK:

Each GLOCK pistol was conceived and designed to accomplish a specific objective. Choosing the optimum solution to best serve your requirements is essential. Therefore GLOCK offers a wide range of handgun dimensions.

The main thing is to find the right model you feel comfortable in action. Try different GLOCK pistols at our local GLOCK Partner to find out which GLOCK fits perfectly in your hands.

Try before you buy!

With over 50 different models, any GLOCK purchase can be a bit confusing with options ranging from different calibers, sizes, generations and dozens of options for modifying your GLOCK. It may be challenging to find the best pistol on the first purchase. Even seasoned GLOCK users might have difficulties choosing a pistol without hands-on-experience with the different models.

With the GLOCK Partners a pool of retailers was created, who know their GLOCKS and help hundreds of customers annually in choosing their perfect model. Have a look at a variety of models and let an expert explain the advantages of each. Decide what your plans are for your new GLOCK and these partners will know which one will fit you best.

Are you looking for a GLOCK Partner?

Our dealer locator helps you to find a certified GLOCK Partner in your area. Find out more on www.glock.com

STANDARD

The GLOCK classic that thousands of soldiers and law enforcement officers have come to appreciate. Perfect magazine capacity paired with GLOCK dependability.

COMPACT

Slightly reduced in length and height compared to the standard models, this GLOCK offers a good punch in a compact package.

LONGSLIDE

The GLOCK with the longest slide on the market offers the greatest distance between sights, fast target acquisition, and GLOCK-grade performance.

SUBCOMPACT

A pocket-size, double stack pistol designed as a backup weapon. This subcompact gun will accept all standard GLOCK double stack magazines of the same caliber, making it one of the most versatile subcompacts on the market.

COMPACT SLIM

The compact slimline frame combines a comfortable slimline grip length with a minimal profile for a comfortably balanced versatile grip and a compact length slim slide, ideal for everyday carry.

COMPETITION

With a slightly shorter slide and barrel than the longslide models the GLOCK competition models feature adjustable rear sights and are made for sport shooters who value accuracy and reliability.

SUBCOMPACT SLIMLINE

The concealed-carry choice for thousands. The GLOCK single stack slimline pistols are the smallest GLOCK pistols with the same trusted accuracy and reliability.

CROSSOVER DESIGN

A shorter slide and a longer frame create a crossover size and join forces in order to provide a comfortably balanced grip and higher magazine capacity paired with reduced weight to increase comfort.

GLOCK 44 Technology

GLOCK 17 Gen5

17 STANDARD GEN5 MOS

THE NEWEST GENERATION OF THE ORIGINAL

The new frame design of the GLOCK 17 Gen5 removed the finger grooves for more versatility but still allows to easily customize its grip by using the different beavertail backstraps. A flared mag-well gives the user more speed during reloading when fractions of a second matter. A reversible magazine catch, changeable at user level as well as the ambidextrous slide stop lever accommodate left and right-handed operators. The rifling and the crown of the barrel were slightly modified for increased precision.

Also available as G17 Gen5 MOS

GLOCK 19 Gen5

THE NEXT GENERATION

The GLOCK 19 Gen5 pistol in 9 mm Luger is ideal for a more versatile role due to its reduced dimensions. The new frame design without finger grooves still allows to instantly customize its grip to accommodate any hand size by mounting the different beavertail backstraps. The reversible magazine catch and ambidextrous slide stop lever make it ideal for left and right-handed shooters. The rifling and the crown of the barrel were slightly modified for increased precision.

Also available as G19 Gen5 MOS

15 COMPACT GEN5 MOS

GLOCK 34 Gen5 MOS FS

The GLOCK 34 Gen5 MOS features an extended barrel and greater slide dimensions, making it a favorite among sport shooting competitors. Design enhancements include the GLOCK Marksman Barrel (GMB) which delivers increased accuracy with enhanced polygonal rifling and an improved barrel crown, no finger grooves, ambidextrous slide stop levers for better versatility and control, and an nDLC finish, which is a tougher and more durable finish that is exclusive to the GLOCK manufacturing process.

Only available as G34 Gen5 MOS

GLOCK 19X

17 COMPACT CROSSOVER CROSSOVER

SUBMISSION FOR THE US ARMY

GLOCK's first ever "Crossover" pistol, the GLOCK 19X, combines the best features of two of its most popular and most trusted field-tested platforms. The full-size GLOCK 17 frame and the compact GLOCK 19 slide have joined forces to produce the ideal pistol for all conditions and all situations. The G19X comes in the coyote color with the first-ever factory colored slide, finished with an improved nPVD slide coating to prevent corrosion. Additional features include the GLOCK Marksman Barrel (GMB), no finger grooves, ambidextrous slide stop levers and lanyard loop. Included with the pistol is a standard 17-round magazine, two 17+2-round magazines and a coyote-colored pistol case.

GLOCK 45

17 COMPACT CROSSOVER GEN5 CROSSOVER MOS

COMPACT CROSSOVER IN BLACK

The G45 is a 9 mm Luger Crossover Pistol which combines a compact slide with a full-size frame. Like the G19X, the G45 incorporates engineering and design advancements developed by GLOCK to meet military and Law Enforcement specifications. However, unlike the G19X, the G45 also features the flared mag-well found on GLOCK's popular Gen5 pistols, and is an ideal pistol for law enforcement and private owners.

Also available as G45 MOS

CROSSOVER MODELS

The G19X & G45 combine the full-size G17 frame with a compact G19 slide. This makes them accessible to every type of shooter.

GLOCK Gen4

Safe Action® Pistols

GEN

4

Every GLOCK Gen4 comes with beavertail backstraps in two sizes. The multiple backstrap frame allows the user to change the circumference of the grip to fit their individual hand size.

The Gen4 has a new rough textured frame (Gen4 RTF) surface designed to enhance grip traction, without being too aggressive. It is present on the frame as well as on the interchangeable backstraps.

The magazine catch of the Gen4 frame is reversible and enlarged towards the rear of the pistol. The reversible magazine catch is more user friendly to the shooter's reach and allows them to switch the catch to the left or right side of the pistol.

SUBCOMPACT SLIM

SLIM

The already legendary G43 is a single stack style, 9 mm Luger caliber pistol. It is ultra-concealable, accurate and a fantastic tool for all shooters regardless of one's hand size. The grip has a built-in beaver tail design which allows the shooter to acquire a high and tight grip. The texture of the grip surface allows a comfortable and reliable operation of the pistol. The large magazine catch makes quick work of removing the six round magazine. Engineered based on the same demanding standards that GLOCK is famous for, the tiny G43 tolerates the same torture tests all its bigger brothers in the GLOCK pistol family withstand.

40 S&W

Safe Action® Pistols

GLOCK 22 Gen5

The new Gen5 frame design without finger grooves still allows to instantly customize its grip to accommodate any hand size by mounting the different beavertail backstraps. The reversible magazine catch and ambidextrous slide stop lever make it ideal for left and right-handed shooters. The rifling and the crown of the barrel were slightly modified for increased precision.

MOS

MODULAR OPTIC SYSTEM CONFIGURATION

GLOCK engineers have developed the Modular Optic System pistol configuration to simplify mounting of popular optical sights. The MOS configuration is the ideal choice to hit your target.

There are numbered GLOCK MOS adapter plates available for optical sights of following manufacturers:

- Adapter Docter, Meopta, Insight **(01/05)***
- Adapter Trijicon **(02/06)***
- Adapter C-More **(03/07)***
- Adapter Leupold **(04/08)***

*depending on slide width

The MOS adapter-sets include a Torx® screwdriver (TX10) and 4 Torx® screws to install the GLOCK MOS adapter plates. All screws come with a drop of glue applied.

The G43X MOS and the G48 MOS do not come with adapter plates.

+ MOS configuration is available for following pistol models:

Compensated Pistols

Safe Action® Pistols

REDUCED RECOIL AND INCREASED PRECISION

The compensated GLOCK pistol models are equipped with an integrated compensator to improve hit patterns during rapid firing.

GLOCK Compensated models

The barrel of a compensated pistol model has two small, elongated ports that straddle the centerline and exhaust through two vents cut into the top of the slide. This parallel port compensation system reduces muzzle flip and felt recoil and aids in quicker second shot target acquisition. The compensated barrel assists to getting back on target quicker for the critical follow-up shot. From the first shot to the last, the shooter gets improved shooting speed and minimum muzzle rise with little or no loss of velocity.

GLOCK Training pistols

Taking training to the next level requires more than just paper targets and an hour at the range. With situations and engagements becoming more complex, modern law enforcement and military units use Force-on-Force training to give their officers and soldiers the training they need to succeed.

The GLOCK Training pistols were developed for the purpose of enabling reality-based tactical operations' training with colour marking or plastic bullet ammunition.

GLOCK offers a wide range of Training tools to help customers prepare for the real world while maintaining the same handling and ergonomics as the regular GLOCK pistols.

GLOCK Practice & Reset pistols

Proper grip, loading, unloading, sight alignment, trigger squeeze and disassembling are all part of a shooter's training routine. The GLOCK Practice Pistol was developed to eliminate dangerous scenarios during training exercises. Identical to a GLOCK pistol in handling, weight, size and balance, it puts the real thing in your hand, without any firing capability.

Expanding the range of GLOCK dry-fire pistols is the Reset pistol. The GLOCK R models were created with shooting simulators in mind. An aftermarket laser impulse generator can be integrated into the barrel, which will fire a laser impulse with every pull of the trigger. Unlike the Practice pistol, the reset pistols trigger will automatically reset after every shot, making racking the slide obsolete during training.

Available models:

GLOCK Magazine Capacity

GLOCK Magazines

Like no other pistol, GLOCK pistols permit a high level of compatibility of the magazines within a caliber. Except for the slimline and slim models, standard magazines, can also be used for backup weapons of the same caliber. Compact and subcompact GLOCK pistol model magazines can be loaded with a compelling number of rounds.

The innovative polymer frame of the GLOCK pistol does not require grip shells. As a result, it has considerably more space for the magazine body and enables double-row staggered cartridge configuration. For this reason, GLOCK pistols are superior in firepower to conventional pistol models of the same size. GLOCK magazines have a stiff metal tube encased in the proven GLOCK high-tech polymer. This resists deformation – even when dropped from great height or exposed to extreme environments.

To reflect user's requirements for higher reloading speed and better visibility GLOCK also offers magazines featuring an orange follower and a floor plate which is enlarged at the front.

Magazines with extended floor plates (for higher magazine capacity) are available in calibers 9 mm Luger, 40 S&W, 380 Auto and 357 SIG.

The GLOCK single stack magazines comply with the reduced dimensions of the subcompact slim and slimline models, a magazine extension for better grip is also available.

The GLOCK Slim 01 magazines only fit for the G43X and G48.

Learn more about the **compact G44 in 22 l.r.** on pages 12-15.

GLOCK Compatibility

The GLOCK Safe Action® pistol is manufactured with only 35 component parts, a significantly lower number of parts than the semi-automatic pistol designs of GLOCK's competitors. This smaller number of component parts increases reliability by reducing the potential for technical problems. The cost associated with spare parts inventory is reduced, which contributes to the lower overall maintenance costs for the life of the GLOCK pistol.

Customize your GLOCK!

For G44 related information refer to pages 12-15.

Modify your GLOCK pistol to meet your individual requirements by changing the sights, slide stop lever, magazine catch, trigger pull or by switching to a threaded barrel.

Colored frames

GLOCK does limited runs for Gen4 pistol models with colored frames. For information about limited runs please check with your local dealer on models and availability.

Combo Pistol Sets

GLOCK offers special runs for GLOCK pistol models that come together with high-quality third-party products and are available for a limited period of time. For information about these attractive GLOCK Pistol Combos please check with your local dealer on models and availability.

G19X PISTOL SET WITH STREAMLIGHT TLR-7AH*

The crossover pistol G19X is available as combo with the light-weight tactical light TLR-7AH from Streamlight. The 500 lumen tactical weapon light features an ambidextrous on/off switch and a rail clamp that is designed to rapidly attach/detach from compact and full frame weapons. The low-profile design prevents snagging and a “safe off” feature prevents accidental activation, saving batteries.

G43X MOS AND G48 MOS PISTOL SET WITH RMSc SHIELD*

The G43X MOS and the G48 MOS are available as a combo with a Shield Red Dot Sight. These Slimline Models combine two well-known GLOCK features, the slim design and the modular optic system that make these pistols the perfect tactical partner. The Shield RMSc red dot sight maintains full functionality in a slim housing designed for concealed carry handguns.

*Scope of supply might vary depending on distributing country, for more details please ask your local dealer.

GLOCK Safety lock*

LOCK YOUR GLOCK PISTOL WITH A CYLINDER LOCK

The GLOCK safety lock is located conveniently in the back of the pistol grip. When engaged it prevents firing and disassembling of the GLOCK pistol. The Safety Lock developed by GLOCK is the first safety cylinder lock for pistols worldwide. GLOCK's modern key technology permits the best possible adaptation to your requirements.

KEY AND LOCK:

Intelligent safety provided by the GLOCK pistol cylinder lock. Each key is absolutely unique through state-of-the-art safety technology.

*not upgradeable

FOR INCREASED DIVERSITY

REMOVE THE DARKNESS

GTL 10 & 11*

LIGHT MODULE

The Xenon light of the GTL 10 and GTL 11 illuminates targets reliably so they are easy to identify. The GTL housing is made of high quality polymer. Minimal weight and an easily accessible switch makes the GTL 10 and 11 ideal for low light shooting. Designed to work specifically with GLOCK pistols equipped with mounting rails*, the GTL 10 and GTL 11 are similar, but with the GTL 11 having an added dimmer function.

A hard storage case made of high resistant polymer as well as a replacement bulb are included with each GLOCK Tactical Light set.

GTL 21 & 22*

TACTICAL LIGHT WITH RED LASER

The GTL 21 and the GTL 22 are high-quality products that feature a red (visible) laser which can be zeroed for pinpoint accuracy. The laser functions either independently or in conjunction with the Xenon-light. Light and laser are manipulated by a centrally placed mode-switch. All this is housed in a high-resistant polymer casing. The mounting mechanism allows the user to attach and detach the light in a few seconds without the need for any tools. A hard polymer storage case, a replacement bulb and an adjustment tool for the laser are included with this GLOCK Tactical Light set.

The GTL 22 additionally features a dimmer function, allowing the user to adjust the light intensity as required.

*Do not fit G43X Rail and G48 Rail.

GTL 51 & 52*

IR LIGHT AND LASER

The GTL 51 as well as the GTL 52 is a tactical light designed specifically and exclusively for military and law enforcement use. In addition to the Xenon-light and the red dot laser, the GTL 51 and 52 features an IR Light and an IR laser. A centrally placed mode-switch allows for each light or laser to be selected separately or in combination with the others.

The GTL 51 and 52 are similar, but the GTL 52 comes with the additional feature of a dimmable Xenon-light and a dimmable IR laser.

A hard polymer storage case, a replacement bulb and an adjustment tool for the laser is included with this set.

GTL Pouch

CARRY YOUR GTL IN A SAFE WAY!

The GLOCK Tactical light pouch made of sturdy polymer is a fast and secure way to carry your GTL and a set of spare batteries. It fits all GTL models.

GTL Laser filter

REDUCE THE LASER OUTPUT!

The GTL laser filter is designed to reduce the laser and infrared laser output.

Lockable pistol case

SECURED PISTOL STORAGE

The GLOCK lockable pistol case has room for one pistol and is made of durable black polymer and egg-crate foam lines the interior. Two latches snap the case shut securely and a molded-in handle makes transport easy. For additional security there is a key lock integrated in the case which comes with two keys.

1. SAFETY HOLSTER

The GLOCK Safety holster with its sturdy polymer shell design features a locking system which fixes a GLOCK standard size pistol model in the holster and releases it again with the push of a button. Simple design and a reliable locking mechanism are the key to this holster. A thumb-activated cover adds an extra layer of security whenever needed. Carry plates of different dimensions can be attached to any service belt for optimum carry comfort of the GLOCK Safety Holster. This versatile system can be mounted as a light weight thigh holster with the help of the GLOCK Tactical belt hanger.

2. SPORT/DUTY HOLSTER

Fitting your standard size GLOCK pistol like a sleeve, while keeping it firmly in place with the help of a button-held retention strap, this polymer holster is sturdy, protects your firearm from all kinds of dirt and absorbs shock, preventing damage.

The same holster also comes as Military holster with a metal clip, designed specifically for military duty belts.

3. SPORT/COMBAT HOLSTER

This simple yet useful little polymer holster allows the GLOCK pistol to sit close to the body, making it ideal for concealed carrying. The flat shape also makes it comfortable to wear. The holster can be adapted to fit a wide range of different belt-widths.

4. MAGAZINE POUCHES

This belt-mounted black polymer pouch holds a single GLOCK magazine. The ambidextrous magazine pouch will accommodate belt widths up to 63 mm (2.48 in). The design provides retention of the magazine without the need for straps or flaps.

Lanyard Clips & Lanyard

FOR SECURED RETENTION

These polymer lanyard clips with an attachment ring for the lanyard hook are fitted into the frame of the GLOCK pistol.

The GLOCK lanyard easily and effectively secures a pistol by snapping the clip hook into the attachment device of the pistol frame.

Dummy barrels for:

G17

G19

G26

Dummy rounds

Empty chamber flag

Dummies

INCREASED SAFETY FOR TRAINING AND STORAGE

GLOCK Dummy products for training purpose are made of sturdy polymer of orange signal color. GLOCK Dummy rounds function like real ammunition for function drills and come in sets of 50 rounds packed in a black polymer box.

Magazine speed loader

INCREASE YOUR MAGAZINE LOADING SPEED

The GLOCK loading aid included in the standard pistol set simplifies loading even for a larger number of rounds. It has a sturdy design made of GLOCK polymer and slides readily over the GLOCK magazine.

Except G44.

Outdoor

Entrenching tool & Field knives

INNOVATIVE TOOLS FOR ANY PURPOSE

The GLOCK outdoor equipment was specially developed and tested according to army requirements.

Entrenching tool

This lightweight, full-folding spade is the innovative product for the 21st century with many intelligent details.

Material know-how from the pistol development guarantees durability and reliability. A functional tool for any outdoor professional.

Three tools in one product: **Spade, shovel and saw**

Weight: 657 g | 23.2 oz.

GLOCK Field knife FM 78

This classic army knife can be used for any purpose: as a weapon or an outdoor knife, for opening ammunition boxes or bottles. The polymer sheath of this knife is also made by GLOCK.

GLOCK Field knife FM 81 (with saw)

In addition to the convincing characteristics of the FM 78, the field knife FM 81 is equipped with a sturdy saw at the back of the blade and a polymer sheath.

AVAILABLE COLORS:

black, battle field green, flat dark earth and grey

GLOCK Armorer's Course

ATTENDING THE GLOCK ARMORER'S COURSE WILL MAKE YOU A CERTIFIED GLOCK ARMORER

GLOCK trainers will familiarize you with the nomenclature of the GLOCK pistol. You will learn the skills required for practical use. Performing service and maintenance operations as well as the functioning of the SAFE ACTION® system will be demonstrated together with all safety precautions.

Upon completion of the GLOCK Armorer's Course, and satisfactory grade on a practical and written exam, you will receive a certificate as a GLOCK Armorer. This will entitle you to carry out maintenance operations and GLOCK approved modifications on GLOCK pistols.

CONTENTS:

Professional know-how concerning the individual components of the GLOCK pistol as well as disassembling and installing the various GLOCK options.

CONTACT:

Public law enforcement agencies are requested to contact their local GLOCK representative. For contact details visit www.glock.com

GLOCK armorer's courses are not offered to private individuals.

Are you looking for a GLOCK Partner?

With over 50 different models, any GLOCK purchase can be a bit confusing with options ranging from different calibers, sizes, generations and dozens of options for modifying your GLOCK.

With the GLOCK Partners a pool of retailers was created, who know their GLOCKS and help hundreds of customers in choosing their perfect model.
